Data Analysis Project – Job Simulation Experience (Forge)

ACCENTURE NORTH AMERICA, 2024

Java Programming | Intermediate: SQL, JavaScript, Python.

SOLOLEARN, 2020 - 2025

WORK EXPERIENCE

WEB DEVELOPER INTERNSHIP | nCircle Tech

January to June 2025

Stacked with MS SQL, Vue.js, and Express.js to build and maintain scalable applications. Gained hands-on experience through active collaboration with senior developers and cross-functional teams. Engaged directly with clients and top management, enhancing communication and problem-solving skills. Contributed to backend logic, UI enhancements, and data-driven features across multiple projects. Took initiative in planning, documenting, and streamlining team workflows, sparking an early interest in product and project management.

WEB & APP DEVELOPER INTERNSHIP | A3M NexGen

July to September 2024

Developed a mobile application for Android and iOS platforms for 500+ users. Designed and implemented an employee management website, improving administrative ease of monitoring by 25%. Created an e-commerce platform and a blog posts website to gain hands-on learning experience in the first part of the internship. Technologies used: React Native, ReactJS, NextJS, MongoDB.

DATA ANALYST INTERNSHIP | Bharat Groww

June to August 2023

Gathered and analysed data from 10+ financial resources, resulting in key insights and reports. Produced 5 major data visualization reports and 2 presentations using Excel. Managed social media ID and ads, increasing customer engagement by 40%. Tools used: MS Excel, PowerPoint, Power BI, Instagram.
